& Window Replacement Project

As a Roofing Expert and a Best Value Contractor, we focus on aspects that can minimize risk for our customers

● **Risk Management**

- As the Roofing Expert, we are able to see a project from beginning to end and make a plan to minimize RISK before the project ever starts
- Being PROACTIVE, not REACTIVE

● **Comprehensive Pre-Plan**

- Pre-Planning Team includes: Project Manager, Estimator, Superintendent, Safety Manager and Quality Control Manager
- “Coming Together” of the Experts to predict project performance

● **Weekly Risk Reports**

- Documentation = Accountability
- Allows us to measure our performance in terms of dominant factors:

TIME , MONEY , CUSTOMER SATISFACTION

Reviewing Weekly Risk Reports allows us to look back and identify strengths & weaknesses – in turn this increases our expertise and allows us to expound on our strengths and correct our weaknesses

THESE FACTORS MINIMIZE RISK IN TERMS OF SCHEDULE (NO DELAYS) AND BUDGET (NO ADDED OR UNFORSEEN COSTS)

- **Fall Inspection**

After a full summer of hot days, cold rains and brutal UV exposure, we'll ensure your roof is ready for another winter.

- **Infrared Thermal Scan**

An infrared scan can detect moisture inside a roof system. Water can be detrimental to a roof, robbing you of years of serviceable life and your energy dollars. Early detection is key to maintaining a properly functional roof.

- **Detailed Documentation of the Roof's History**

Is your roof under warranty? Many warranties require proper yearly care. First Infinity Construction, Inc. will provide detailed reports and documentation should a warranty claim arise.

- **Full Recommendations and a Detailed Course of Action**

Any finding we may make will be accompanied by a severity ranking and a suggested action plan.

- **Energy Summary**

Your roof plays a big part in your heating and cooling costs. We can help determine the energy efficiency of your roof and suggest ways to save you money.

- **Spring Inspection**

The winter elements can be devastating to a roof system. A spring inspection is ideal to check how the roof weathered and to make any necessary repairs.

- **Protect Your Investment**

Often overlooked, your roof is a maintainable asset. A proper maintenance plan pays for itself many times over. Your roof will last longer and perform better.

First Infinity Construction is an Atlanta based company built on over two decades of excellence. We strive to please our customers by completing our jobs quickly, efficiently and affordably. At First Infinity Construction, we offer a variety of construction services, more specifically roofing, renovation and remodeling.
